2012-09-01

eCameron (Camas) and Formos (Vancouver) together announce new business contracts to work jointly with Ageology, a Chicago-based start-up specializing in age management products and services, to deliver a Software as a Service (SaaS) platform designed to help age management physicians run their medical practices and maintain patient records. Under the multi-million dollar contract, the Ageology project will release beta software followed by incremental releases over the next 18 months.

Formos (www.formos.com) will be responsible for the design and development of the software. According to Matthew Tunnell, CEO of Formos, this is a marquee project which will benefit significantly from their local Vancouver talent as well as their Ho Chi Minh City, Vietnam engineering staff. "We are excited and honored to be selected as the development partner for eCameron and Ageology on this project" said Mr. Tunnell. "Our blended software development model utilizing our local project leadership and our offshore development team is an excellent fit for this project. This underscores our position as a global services company that delivers solutions to a wide variety of business sectors."

eCameron (www.ecaminc.com) will continue to provide IT consulting services as they have since January 2011. This includes providing project management and building the operational procedures for the continued support for the system, as well as advisory services in establishing Ageology's customer service and operations functions.

"This is excellent business for us and Clark County," according to eCameron's President, Todd Williams, "It directly addresses Clark County Economic Development Plan's number one goal to establish Clark County as a regional center of growth and innovation in the Information Technology sector," Mr. Williams continued. "Formos outshined eleven other development providers on the west coast to provide these services." We are very excited to continue our relationship with Ageology and start a new relationship with Formos.

"eCameron and Formos expertise provide Ageology the perfect virtual IT support," said Dr. Paul Savage, Ageology's CEO (www.ageology.com). Dr. Savage, a nationally recognized expert in age management medicine in Chicago, started Ageology in October 2011. Within the first 6 months of operations, Ageology has expanded to 20

physicians and growing in the Chicago area.

Dr. Savage's vision and goal, is to increase the role and awareness of the medical industry to practice proactive preventative healthcare.

"As a physician, I did not know where to look, what to look for and how to select and manage a software developer. We have been working with eCameron for over a year as they have helped us pull together the business and technology plan needed to get our funding and select a developer. Formos has been working in the bid process for the AMSA software development since November 2011. That makes them a known quantity and we expect this to be a wonderful relationship."

Ageology's initial plans are to deploy their software solution for bioidentical hormone therapy doctors in the Chicago area along with other tools to help their age management practices grow efficiently. Other Ageology business offerings include a website focused on health and wellness, which empower patients to find a physician specializing in a holistic approach to health including bioidentical hormone therapy, a group-purchasing plan designed to leverage purchasing power on pharmaceutical grade vitamins, and physician education.

END

About Ageology

Ageology is an organization designed to match patients looking for top-notch age management care with qualified healthcare professionals in the metropolitan area in the United States with the first being Chicago. It offers physicians business and technology tools such as an online marketing program, health supplement distribution center, a group purchasing organization, medical education series and age management software designed for doctors specializing in age management medicine, including bioidentical hormone therapy

Ageology Physicians include the most trusted preventive health and wellness doctors specializing in treating men and women suffering from menopause, andropause, perimenopause, PMS and other hormonal imbalances using nutrition, fitness and bioidentical hormone therapy. Ageology is dedicated to preventing chronic diseases such as obesity, cardiovascular diseases, diabetes, stress, sleep disorders, and the libido pitfalls from aging. Ageology moves away from the "disease" paradigm and towards addressing the common underlying mechanisms of regaining and sustaining long term health. In addition, Ageology creates long-term excellence, appropriate infrastructures and career opportunities for young scientists and physicians.
