

Project Health Check

Assurance • Experience • Trust

Projects never go bad overnight. It takes time. They slowly drift away from the baseline. Maybe it is a change request that goes undocumented, or a series of tasks that run a little late, or an over-optimistic employee not realizing they are in trouble, or misinterpreted communication. They all add up over time and are very difficult to detect while you are in the heat of the delivery. It often takes an experienced outsider who is removed from the history and politics to see the issues and make the recommendations that will keep a project on track. The Project Health Check does just that—keeping your project healthy.

Benefits:

- Independent and un-biased review of organization and project issues identified at their root causes.
- Proactive actions to address issues at their root causes reducing the chances of reoccurrence.
- Identification of potential mitigations for risks.
- Expert visibility and insights that will assist in ongoing sponsorship, governance, and execution of projects.
- Coaching and mentoring from eCameron resources with experience in a wide range of projects that have a technology component.

VISION to VALUE

Assurance • Experience • Trust

What It Consists Of:

Periodically, on a mutually agreed schedule, we analyze nearly thirty aspects of your project throughout its lifecycle. The resulting assessments are grouped into six major classifications to give you a clear and concise picture of your project to understand how to correct any issues.

What You Get:

Within a few days of the onsite review, you will receive an assessment report that identifies the overall condition of your project. The report uses familiar red/yellow/green indicators and includes a narrative for each of the areas.

How It Works:

Every few months a Project Health Check is conducted by one of our Executive Consultants. A combination of remote and onsite activities (including interviews, document reviews and procedure assessments) are conducted to assess each area of your project, provide a rating, and recommend corrective actions. The length of each assessment is dependent upon the size of the project; however, within days of its completion you will receive the Project Health Check and verbal walk-through.

Pricing:

Project Value		Price
More than	Less than or equal	
0	\$3MM	\$6,700
\$3MM	\$20MM	\$12,700
\$20MM	\$50MM	\$19,700
\$50MM	Call for Quote	

*A minimum of two Project Health Checks must be purchased. Travel costs and time extra.
