

Project/Program Launch

Assurance • Experience • Trust

A project's destiny is set very early, often before the project even starts. A properly run project launch is the first opportunity when all of the key project stakeholders are gathered and can identify and correct issues. Critical to the kickoff's and project's success is having the right stakeholders reviewing and agreeing to the project approach, risks, and mitigations.

Benefits:

- Set up the project for the best chance of success.
- Define the proper project approach through prototyping solutions.
- Identify and vet major project risks.
- Assess mitigation strategies.
- Determine contingency requirements.
- Attain consensus on roles and responsibilities.
- Solidify accountability.
- Define the communication plan.
- Unparalleled team building.

What It Consists Of:

Project Kickoffs are unique to your project. Using our proven Launch Framework that ensures all aspects of your project are accounted for, we study your project proposals, contracts, and SOWs, interview select stakeholders, and design a kickoff that will surface potential misunderstandings to ensure that everyone has a clear view of the project parameters. In a facilitated onsite meeting, we:

- Conduct a project prototype to identify potential changes in the project execution.
- Raise "taboo" topics in a politically neutral setting.
- Run a risk identification session.
- Identify mitigations and contingencies.

VISION to VALUE

Assurance • Experience • Trust

- Use the Project Success' Project Risk board game to model risks and test and uncover other mitigations.
- Define and test roles and responsibilities in a future state project prototype.

What You Get:

At the end of the kick-off session you will have all the information to build a project charter and communication plan. Everyone agrees with it, since they developed it. Buy-in and change management are easy, since everyone has endorsed the concepts in the meeting. Your major risks are defined and mitigations tested through the Project Risk game. The team is coalescing and understands how to work together. The results are priceless, cutting through weeks of emails and conference calls trying to accomplish the same goals.

How It Works:

We review your project artifacts to understand your goals, interview key stakeholders to capture what on this project will keep them up at night. We have an “elephant meeting” with the sponsor to identify elephants-in-the-room that others will be hesitant to discuss. We will design a kickoff to address your issues, concerns, and uncover areas you may not realize are problems. We help get your project started on a path to success.
